## Presentation

Qur'ān is the book of Allāh that was announced by revelations to Muhammad (p.b.u.h), Prophet, in 23 years of his prophet hood. It starts with the opening chapter al-Fātiḥa and ended with the chapter of al-Nās. Since the revelations were made it has been transmitted from one generation to another by way of both in written and orally.

The announcer in the Qur'ān is invariably Allāh. Again, the import that is included in word as well as the composition of the words is belonging to Allāh.

Prophet, who initially lip-synched the words agitatingly to memorize them lest he forgot, was warned by Allāh as:

﴿ تَوَلَّىٰ بِهِ لِسَانَهُ الْقُرْآنَ حَيْثُ يَنْتَظِرُ الْبَاقِي ۚ ﴾

“Move not your tongue concerning (the Qur'ān) to make haste therewith”<sup>1</sup>

In the ayat which comes right after such warning, Allāh relieves his prophet, who falls in fear of forgetting some parts of the Holy Qur'ān and consequently causes the Holy Qur'ān to remain incomplete, in such a way just at the beginning of the affair:

إِنَّا جَمَعْنَاهُ وَقُرْآنَهُ

“To gather it and make it read **certainly belongs us**”<sup>2</sup>

Thus, the exalted Allāh announced firsthand that he has undertaken gathering of the Holy Qur'ān and transmitting it to mankind as Holy Qur'ān.<sup>3</sup>

The exalted Allāh provided protection for Qur'ān that He never had made it before for the books of local religions just because it is the source of the right way of a universal religion that will last until doomsday.

إِنَّا نَحْنُ نَزَّلْنَا الذِّكْرَ وَإِنَّا لَهُ لَحَافِظُونَ

“Verily, We, it is We Who have sent down the Dhikr (i.e. the Qur'ān) and surely, We will guard it (from corruption)”<sup>4</sup>

Then, we might say that Qur'ān, in every respect, is under the protection of Allāh. It will be transmitted to the next generations just as had been done to our generation by Him.

The exalted Allāh who transmitted Qur'ān to us makes references, in many chapters, to Himself as ‘el-Alīm’ meaning that ‘The All-Knower’ or ‘the Omniscient’. Thus, it may well be understood that, everything that man have already learned to date and will have been learned in future Allāh has already possessed.

Mathematics is the common language of mankind. Allāh taught it to mankind in order to appreciate his own Essence. He honored the people who had knowledge about mathematics as ‘the group who knows’

مَوَدَّةَ الَّذِينَ هَدَىٰ وَالشَّيْءِ الْيَسِيرِ وَالْقَمَرِ نُورًا وَقَدَرَهُ مِثْقَالَ ذَرَّةٍ

<sup>3</sup> There is some information available concerning the arrangement of some surahs that they had been made by interpretation with regard to collection of the Holy Qur'ān. However, both the ayat hereinabove and the magnificent numeric structure which stands before us shows that the Holy Qur'ān is under the observance of the Allāh.

<sup>4</sup> Al-Hijr/9

number of years and **the reckoning**. Allāh did not create this but in truth. He explains the Ayat (proofs, evidences, verses, lessons, signs, revelations, etc.) in detail, for a people who have knowledge”<sup>5</sup>

The exalted Allāh regards himself as superior on mathematics stating in a chapter that:

وَكَمَلْنَا بِهَا الْحَاسِبِينَ

“And Sufficient are We as a Reckoner”<sup>6</sup>

In another chapter He states that his calculation is infallible:

إِنَّ اللَّهَ كَانَ عَلِيمًا نَاصِتًا

“Certainly, Allāh is Ever a Careful Reckoner of all things”<sup>7</sup>

By another chapter he let us know that He is “the fastest” in calculations:

وَهُوَ أَسْرَعُ الْحَاسِبِينَ

“He is the Swiftest among the Reckoners!”<sup>8</sup>

There is no wonder that He, who is very sure of Himself on calculation, organized a book that is called by His name in a way that it attracts attention of the people who have knowledge about mathematics.

We are observing the transcendental knowledge of Allāh on mathematics in every point of the universe. The human race makes use of mathematics as it studies substance. The wondering

admiration of mankind that it feels for its Creator has been increased as it has figured out the art that has been engraved in everything created by Allāh.

Why don't we make a similar kind of investigation which we have made on his creatures also on his Book which was sent by the same Essence? This study herein has been prepared by setting out from this starting point.

Symmetric Book constitutes some part of the studies that we have made in this field. As the expression of “symmetric” is the result of our mathematical researches on the Holy Qur’ān it is the specification which was used by Allāh who sent the Holy Qur’ān by himself for his own book at the same time:

اللَّهُ نَزَّلَ أَحْسَنَ الْكِتَابِ مُتَشَابِهًا مُمْتَلِئًا تَقْشُرُ مِنْهُ جِلْدُهُ لِيُفْشَوْا رُجُومُهُ ثُمَّ يُرْمَى بِهِمْ قُلُوبُهُمْ إِلَهُ ذُكِّرَ اللَّهُ فَلَا إِلَهَ إِلَّا اللَّهُ يَهْدِي بِهِ مَنْ يَشَاءُ وَمَنْ يُضِلِلِ اللَّهُ فَمَا لَهُ مِنْ شَيْءٍ

“Allāh has sent down the best Statement as a **binary symmetric book**. The skins of those who fear their Lord shiver from it. Then their skin and their heart soften to the remembrance of Allāh. That is the guidance of Allāh. He Guides therewith whom He wills; and whomever Allāh sends astray, for him there is no guide.”<sup>9</sup>

Symmetric Book consists of establishments at a level so that everyone whether is on good terms with the figures or not can get benefit. The analyses were performed by only using the four arithmetical operations. Any result that is an outcome of advance mathematics is not included in this book on purposely.

The Holy Qur'ān introduces itself as a book “which has not any rayb (suspicious thing, uncertain knowledge) inside.”<sup>10</sup> This is a situation which is specific for Allāh's book. It can not be thought the things that are told or written by us in other words by his servants to be faultless and perfect. Consequently we would like to thank you to the readers who will share our faults with us at this very moment.

I assume it as an obligatory duty to thank to the gentleman, my respected master Prof. Dr. M. Ali SÖNMEZ who encouraged me by his suggestions and recommendations on the studies that I have made in this field as much as he did in my studies in the Hadith subject; to my valuable brother Haydar SOYSAL who is an electrical engineer and who has been always on my side and has substantial contributions in every stage of this book and to my family members who welcomed my studies with great patient and toleration

## Index of the Holy Qur'ān

In the index of the Holy Qur'ān each surah (chapter) is defined with two numbers. One of them is the sequence number which shows the place of the surah in the serialization. The other one is the number which specifies the number of verses (ayats) contained in the surah.<sup>1</sup>

Example:

There are 114 surahs included in the Holy Qur'ān. Consequently there are 114 sequence numbers and 114 ayat numbers which correspond to such sequence numbers in the index:

<sup>1</sup> Hereby, it shall be helpful to remind that: There are printing press errors available in point of the numbers of ayat in some of the indexes of the Holy Qur'ān. Our readers who shall wish to verify the approaches that we have given in this book should before all else review and emendate their indexes which they are using with regard to the number of ayats of which are contained in the surahs.

List-1

As it is seen the ayat numbers of the surahs exhibit an extraordinary appearance. It is not possible to understand intuitively that there is a connection between them at first sight. Forwhy they are in an arrangement which is as dispersed as possible.

This book analyses the serialization of the surahs and the numbers of ayats which are included in the Holy Qur'ān by numeric methods. Hence, the list hereinabove will be subject to different mathematical approaches in each section of this study.

## Odd and Even Numbers

Let us divide the 114 surahs which are included in the Holy Qur'ān into two sets as odd and even numbers with respect to their ayat numbers:

### The set of surahs which has odd ayat numbers

Figure-2 The equal distribution of the surahs which has odd numbered ayats is seen with respect to their sequence numbers.

### Evaluation

It is very striking that such 54 surahs which give an appearance as they were extraordinarily lined up to be divided into two as 27 odds and 27 evens by being paired with sequence numbers one to one.

If these 54 surahs were lined up with a consecutive arrangement, then to be divided into two as 27 odds and 27 evens with respect to their sequence numbers would be considered to be normal. In other words if such 44 surahs have constituted the first 54 surahs of the Holy Qur'an, or if they have been placed as the last 54 surahs, then to be dividable into two as 27 odds and 27 evens can be deemed as natural.

It is considerably striking that such a balance to be appeared from extremely complex arrangement. In order to understand the difficulty of such balance let's assume the case if any of the surahs of the Holy Qur'an has one missing or one additional ayat: For example if the Surah *al-Ikhlās* has been consisted of 4 ayats in lieu of 3 ayats? In this case the number of the surahs which have odd numbered ayats should have decreased by one and the number of surahs which have even numbered surahs should have increased by one. In other word the set hereinabove should be a set which has 53 elements. Then, aforementioned balance should have been disappeared for the reason that 53 can not be divided by two. On the other side, the number of the surahs which have odd numbered sequence numbers in such set should have been decreased to 26 from 27. This situation is valid for each surah of the Holy Qur'an. This existing balance can be completely destroyed by any minimal increment or reduction at any of them. This analysis that we made is also valid for any result henceforward.

Now, let's examine the surahs which have odd numbered ayats with the same approach.

## The set of surahs which has homogeneous ayat number and sequence number

Let's take on these two numbers together which concern a surah. Let's make those which have even numbered surah sequence numbers and even numbered number of ayats with the odd sequence numbered surahs and odd number of ayats one set (homogeneous); and those which have odd sequence numbered surahs whereas their number of ayats are even or which have even numbered surah sequence numbers but odd numbered of ayats a separate set (non-homogeneous).

Example for the surahs with homogeneous sequence numbers and number of ayats:

1 Al-Fātiḥa 7

The sequence number and also the number of ayats of the surah of al-Fātiḥa are odd numbers. Consequently, surah of al-Fātiḥa is **a homogeneous** surah in this sense.

2 Al-Baqarah 286

Surah al-Baqarah is also **a homogeneous** surah. Forwhy, its sequence number and number of ayats are even numbers, in other words they are of same type.

Example for the surahs of which their sequence numbers and number of ayats are not homogeneous:

3 Āl 'Imrān 200

Surah Āl 'Imrān is a surah which has an odd sequence number but an even number of ayat numbers. Consequently Surah Āl 'Imrān is a surah which is **not homogeneous** in this sense.

6 Al-En'am 165

Al-En‘ām surah is also a surah which is **not homogeneous**.  
Forwhy although it has even sequence number, its number of ayats are odd numbers; in other words they are not of same type.

Now let's see the components of these two sets separately:

## List-9

The number of the components of this set of which is composed of surahs that have non-homogeneous sequence number and number of ayats are 57.

Consequently the Holy Qur’ān is composed **halfly** homogeneous and **halfly** non-homogeneous surahs.<sup>1</sup>

Let’s see the results which outcome collectively:

وَإِنَّكَ لَتَلَقُّهُ الْقُرْآنَ مِنْ لَدُنْ حَكِيمٍ عَلِيمٍ

“And verily, you are receiving the Qur’ān from the One, All-Wise,  
All-Knowing”  
(Al-Naml/6)

<sup>1</sup> Another method to see this case is this: Sequence numbers and the number of ayats of the surahs are added. From the outgoing 114 numbers, even numbers and odd numbers are grouped in separate sets. It is observed that the new two sets are counterbalance.

In the figure, equal distribution of the homogenous and non-homogenous surahs is shown.

***Evaluation***

It shows how the balance that we have mentioned hereinabove was constructed by fine tuning when we take into consideration that the number of the components of the sets of which have homogeneous sequence numbers and number of ayats and the sets of which have non-homogeneous sequence numbers and number of ayats. This situation does not give any space for any doubt that the sequence numbers of the surahs and the number of ayats are the parts of the same system.

Now let's examine what kind of distribution do the set of homogeneous surahs and set of non-homogeneous surahs exhibit when just the middle of the Holy Qur'an is taken as reference. There are 114 surahs in the Holy Qur'an. If we divide it into two equal parts just from the middle, the surahs from 1 to 57 shall be included in the first middle whereas the surahs from 58 to 114 shall be included in the second half.

**The surahs which have homogeneous sequence number and number of ayats and which are included in the first half of the Holy Qur'an.**

In the figure, symmetric distribution of the homogenous and non-homogenous surahs to the first and second half of the Quran is shown.

We shall discuss an inconceivable situation which points out the numeric connection between these two number lines at the end of our analysis within the context of odd and even numbers. In order to observe this before all else let's define two sets:

Set of surahs of which the total sum of sequence numbers and number of ayats is an odd number

Set of surahs of which the total sum of sequence numbers and number of ayats is an even number

#### Set of surahs of which the total sum of sequence numbers and number of ayats is an odd number

*Evaluation*

Such a situation is a fabulous clue which indicates that such numeric arrangements harbor magnificent connections in its interior. It is clear that such numerical structure can not be explained by coincidences when it is analyzed by a mathematical view. There should be an authority, a power which determines this complex structure. It shall be an imaginary approach to think that the people who lived 14 centuries ago had realized such a numerical structure also on an index.

A human being is obliged to realize one of the two cases below against this panorama.

Firstly, he/she shall allege that are mistakes in the calculations and shall prove such allegation.

He/she surrenders.

Let's see the results which outcome collectively:

## Surahs of which the number of ayats are greater than sequence number

If there appears a positive value other than zero when we subtract the sequence number from the number of ayats of a surah, then it means the number of ayats is greater than the sequence number in such surah.

Example:

**Difference** = number of ayats – sequence number

**Difference** = 7 — 1 = 6

If the difference is a negative figure, then this means the number of the ayats is smaller than the sequence number.

The surahs of which their number of ayats is greater than the sequence number and the differences are shown in the list below:

In the figure, symmetric distribution for the surahs of which their number of the ayats is greater than the sequence numbers is shown.

## Surahs of which the number of ayats are smaller than sequence number

Now let's perform the same analysis which we have made for the surahs that have the number of their ayats greater than their sequence number for the surahs of which has the number of surahs smaller than the sequence number.

The surahs of which their number of ayats is smaller than the sequence number and the differences are shown in the list below:
